

Het Makadia Software Developer

 Orange, CA  makadiahp@gmail.com  (657) 295 - 9821  <https://hetmakadia.dev/>
 www.linkedin.com/in/hetmakadia

PROFESSIONAL SUMMARY

Software Developer with 2+ years of experience building scalable web applications and enterprise tools using **React, Angular, .NET, C#, JavaScript, SQL Server and other**. Proven ability to modernize legacy systems, streamline workflows, and deliver user-centric solutions. Adept at working in Agile environments with a strong understanding of software lifecycle and data-driven development.

WORK EXPERIENCE

Associate Software Developer

10/2023 – present

MSI Surfaces

- Developing and maintaining **8+ internal enterprise applications** using **.NET Framework, C#, JavaScript, SQL Server, Bootstrap**, and **REST APIs**—modernizing UI/UX and backend workflows.
- Built and deployed a **Cycle Count Dashboard** that replaced manual Excel tracking, improving real-time visibility and cutting process time by **30%**.
- Supporting **NetSuite ERP migration** by updating stored procedures, modifying schemas, and adapting backend logic.
- Using **JIRA** to manage tasks, track bugs, and communicate updates with team leads for better sprint planning and delivery.

Application Development Intern

06/2022 – 05/2023

EMPLOYERS Insurance Group, Inc.

- Converted an Excel-based “Access Report” into a web app using **Angular v16, TypeScript**, and **Java** backend, implementing **RxJS observables, Angular forms**, and **component-based architecture** for maintainability.
- Integrated MongoDB for persistent storage, applied **lazy loading** and **route guards** in Angular Router.
- Operated in a fast-paced **Agile environment**, managing stories and timelines in **JIRA**, delivering the project **1 month ahead of deadline**.

EDUCATION

Bachelor of Science - Computer Science

01/2019 – 05/2023

California State University, Long Beach

PROJECTS

Supreme Carbon Website

02/2024 – 04/2024

React.js, JavaScript, ES6, Firebase, Google Maps, Tailwind CSS, JSON, Github

- Designed and developed the **official website** for **Supreme Carbon**, a manufacturing business in India, using **React.js, Firebase, Tailwind CSS**, increasing user engagement by **20%** and improving mobile experience.
- Managed hosting, domain, and deployment on **GitHub Pages**, delivering a full-stack solution.

Rooster Web Application

08/2022 – 04/2023

React.js, JavaScript, ES6, Firebase, GitHub, Tailwind CSS, JSON

- Co-developed Rooster - a **roommate finder web application** for a Senior Project, implementing features such as user matching, advanced search filters, in-app messaging, mini-games, and account management to address the needs of students and professionals seeking compatible roommates.
- Developed a multi-page roommate finder app with **React Router v6, Context API**, and custom **hooks** for authentication, chat, and search filters. Implemented **lazy loading**, real-time messaging via Firebase Realtime Database, and **debounced search filtering** for large datasets.

Real Estate Website

08/2022 – 12/2022

React.js, JavaScript, ES6, SQL, GitHub, Bootstrap

- Developed a website for a realtor - real world client, contributing to both frontend and backend development while gathering client's requirement and following SDLC.
- Created an admin dashboard with **controlled components, API-driven Google Maps integration**, and Calendly scheduling. Optimized large property listings using React.memo and list virtualization, backed by SQL stored procedures for CRUD operations.

SKILLS

Frontend: ReactJS, AngularJS, JavaScript, ES6, TypeScript, HTML5, CSS3, Tailwind, Bootstrap, JSON, Material UI

Backend: Java, C#, Python, .NET

Database: Firebase, MongoDB, SQL Server

Source Control/IDE/Software: GitHub, Azure DevOps Server, JIRA, Bitbucket, Trello, IntelliJ Idea, PyCharm, WebStorm, Visual Studio Code

Other: Software Development Life Cycle, Agile Methodology, Object Oriented Programming, Algorithms, Data Structures
